

# CONSUMABLES

To comply with end product specifications, **molten aluminium** must first be treated to **remove impurities**. To this end, the metal must go through various **aluminium refining processes**, each requiring a different piece of specialized equipment and **associated consumables**.

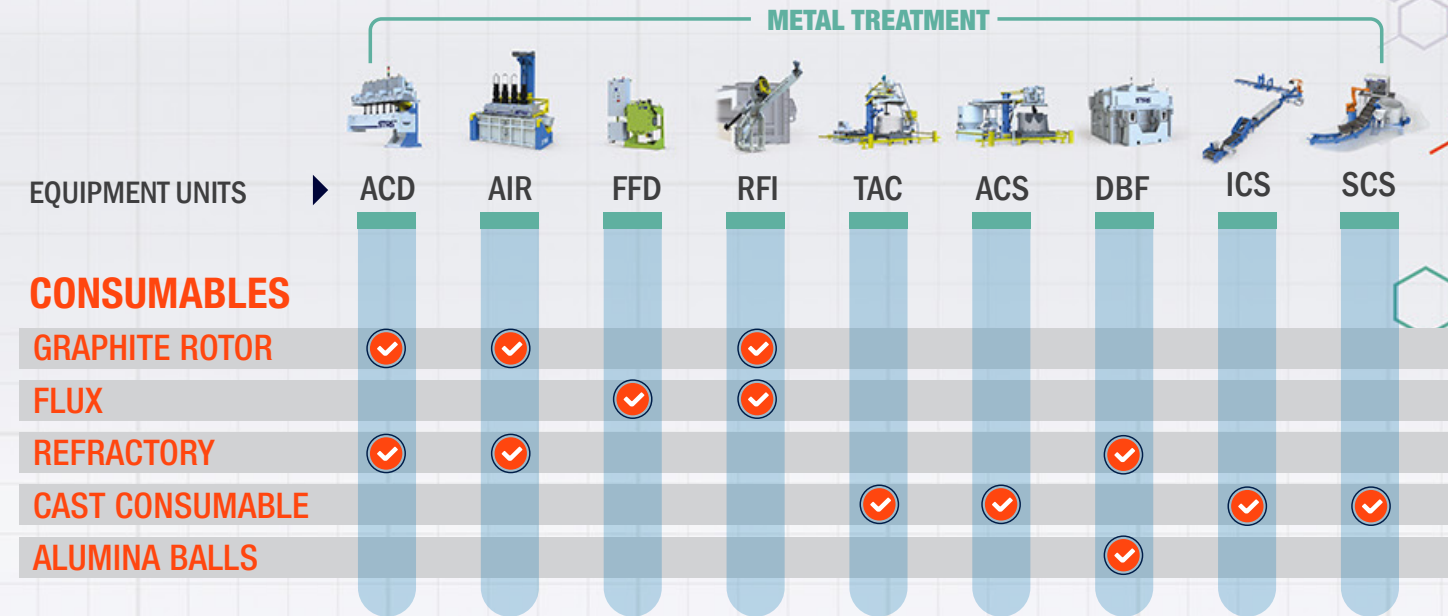

## Benefits of STAS consumables

- 1** Designed and tested specifically for STAS equipment

  - > STAS spare parts are made of high-quality raw materials that meet all industry standards
  - > You are informed of the latest improvements, allowing you to benefit from high performance parts, better safety, lower costs, and more
- 2** Stress-free delivery

  - > Assurance that STAS will deliver the appropriate components for your equipment, in-time
  - > Storage and delivery available anywhere in the world
  - > Annual contracts available
- 3** Warranty

  - > High quality workmanship
  - > 24/7 customer support

## About our certified distribution network

 Over 200 customers in more than 40 countries using hundreds of equipment units

 More than 50 000 parts processed for thousands of shipments every year through our distribution network
